Job Description

The mission of the Ophthalmic Dispensing program is to prepare graduates to be licensed opticians. The program consists of systematic instruction in all aspects of work in the profession. The program includes instruction and laboratory training in contact lens skills, eyewear dispensing skills, lens finishing techniques, lens surfacing, as well as in sales techniques, basic business operations and communications. Instructions in low vision aids, prosthetics, and physician assisting skills is also covered. The program curriculum is designed to assist the student to be successful with national certification and state licensure examinations.

Career Opportunities

Employment for ophthalmic dispensers (opticians) is expected to increase faster than the average for all occupations through the year 2025. An increase in demand for corrective lenses is expected due to growth in the population of middle-aged and older adults.

Program Description

The Ophthalmic Dispensing program at CSN is a two-year program of study leading to an Associate of Applied Science degree. The curriculum provides didactic and clinical or hands-on training. It offers the student the opportunity to become proficient in all phases of ophthalmic dispensing.
