Job Description

The nursing assistant is an important part of the nursing care team. A nursing assistant is a person who, under the direction of a licensed nurse, performs basic nursing and restorative services for patients and clients which involve:

- Safety
- Comfort
- Personal Hygiene
- Basic Mental Health
- Protection of Patient Safety
- Observation and Reporting

Career Opportunities

Nursing assistants generally are employed by:

- Long-term Care Facilities
- Home Health Agencies
- Hospitals

Course Description

This is a nursing assistant preparation class. Students are required to take 180 hours of class over one semester which includes: lectures, lab, and clinical work.

A usual semester will require one 3-hr lecture, one 3-hr lab and one 7-hr clinical per week. The lecture is also offered online. Upon successful completion of this course, the student will be awarded a Skills Certificate and will then be eligible to apply for state certification by examination.

Personal Profile

- Age 16 or older
- Good moral character
- Good physical health
- Read and write English at an 8th grade level

Potential Disease Transmission

Students entering the Nursing Assistant course are informed that certain risks are involved in health care. These risks include, but are not limited to exposure and contact with infectious/communicable diseases such as Hepatitis B, Hepatitis C, and HIV. Though tasks performed by a Certified Nursing Assistant are generally low risk for contracting infectious diseases, working around blood and other body fluids always holds some potential for infection. All healthcare professionals should be vaccinated against Hepatitis B.

Though not mandated for Nursing Assistant students considering enrolling or currently enrolled in the Nursing Assistant course are highly encouraged to begin the Hepatitis B vaccination series as soon as possible. The
