

Smart Classroom Update!

Over the next two weeks, OTS will be updating your classroom technology equipment. This includes brighter projectors, an updated touch panel, the addition of a WePresent and other technological improvements within the podium.

Interactive Presentation

WePresent

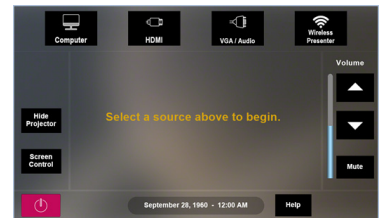

This presentation application is easy to use and allows for presentation, interaction, and collaboration between users with any device. Features include seamless sharing between multiple users and devices, improved BYOD (Bring Your Own Device) compatibility, and intuitive on-screen user preview and moderator controls.

Touch Panel Display

Touch Panel

The updated touch panel has similar controls that you are used to with some slight improvements to the user interface to make it more intuitive and easier to use.
